#### 貳、英翻中(每題十分,共二十分)

- The Israeli army Sunday began to stand down some of its reservists mobilized for a potential offensive in Gaza, according to Israeli military sources. Sharon ordered the deployment in preparation for an attack after a Palestinian terror bombing Tuesday in the coastal city of Rishon Letzion that killed 15 people. But concerns were raised that if Israeli soldiers were to enter Gaza, they would face fierce fighting in the heavily populated area, and there could be civilian casualties even higher than the dozens who died in Jenin during Israel's sweep of the refugee camp there last month.
- Jimmy Carter's five-day visit marks the first time an American president -- sitting or former -- has come to Cuba since Calvin Coolidge in January 1928. Relations between the two nations deteriorated when communist revolutionaries led by Castro overthrew the U.S.-backed government in 1959. In more than four decades since, tensions have been ignited by numerous incidents and personalities, from the Cuban Missile Crisis to the Mariel boatlift to the Elian Gonzalez saga.
