[Abstract Book](#)

You may search for particular presentations by typing keywords, an author's name, or the title in the box below. You may specify the type of search, i.e. whether you want to see pages that contain any or all of the words you specify. The Boolean search option recognizes the keywords and, or, and not, as well as parentheses.

Gastrointestinal (GI)
Immunology
International and Cross-Cultural Perspectives
Interventions - Non-pharmacologic - Infant, Toddler, and Preschool
Interventions - Non-pharmacologic - School-Age, Adolescent, Adult
Interventions - Pharmacologic
Invited, Keynote Speakers, Awards
Late Phase Drug Development
Medical and Psychiatric Comorbidity
Molecular Genetics
Molecular Neuroscience
Neuroanatomy
Neurochemistry
Neuroimaging
Neurological Findings
Neurology
Neurophysiology/Electrophysiology
Neuropsychology
Novel Therapeutic Approaches (gene, protein or RNA targeted therapies)
Pediatrics
Postmortem Studies
Rare Genetic Disorders
Sensory, Motor, and Repetitive Behaviors and Interests
Sensory Physiology
Service Delivery/Systems of Care
Social Cognition and Social Behavior
Social Neuroscience
Special Interest Groups (SIGs)
Statistical Genetics
Technological Approaches
Technology Demonstration / Devices

Data presented at the INSAR Annual Meeting is the sole responsibility of the authors. The sponsor of this Meeting, the International Society for Autism Research (INSAR), takes no responsibility for its accuracy. Submitted abstracts are reviewed only to ensure that the authors will be presenting empirical data and that aims and conduct of the study, as far as can be ascertained, are consistent with international ethical guidelines for scientific research (Declaration of Helsinki). Acceptance of an abstract for presentation at the Meeting does not represent an endorsement by the Society of the quality or accuracy of the data and their interpretation, which judgment must await publication in a peer reviewed journal. Consumers should recognize that study data presented at meetings is often preliminary and in some cases speculative, and that findings and conclusions have not undergone the rigors of a true peer review process.
