[About this book](#)
[About the authors](#)
[About this book](#)

This book discusses the situation of Taiwanese universities facing a rapidly changing domestic and global environment. It examines the social structure, drawing on professional perspectives, data-based and systematic analysis. The book fills gaps in the literature of higher education systems in East Asia, of which Taiwan is a representative nation. It provides the readers with great opportunities to understand the historical, political and cultural background of the higher education system in Taiwan and shares Taiwan's experience of how higher education institutions respond to the new challenges such as an ageing society, the pursuit of equity and inclusion, execution of talent recruitment, and the use of technological innovation. Finally the book discusses the implication of institutional research in university governance.
