

LIST OF TABLES

Table 2.1 The frequent itemset mined by FP-Growth.....	16
Table 3.1 The list of candidate supersets, and their supports.....	21
Table 3.2 The answer for the example in Figure 3.10.....	33
Table 4.1 Parameters for dataset generator.....	38
Table 4.2 Descriptions for the abbreviations of values of parameters.....	38
Table 4.3 The larger and smaller datasets used in our experiment studies.....	39
Table 4.4 Execution time in seconds for taking the complement of two dataset D10kT10N20 and D100kT60N100.....	39
Table 4.5 Execution time in seconds for different minimum support (D10kT10N20).....	40
Table 4.6 Execution time in seconds for different minimum support (D100kT60N100)...	40
Table 4.7 The execution time for generating the complement dataset.....	42
Table 4.8 Execution time in seconds for different number of transactions from 10k to 100k (dataset=T5N15, minsup=60%).....	43
Table 4.9 Execution time in seconds for five algorithms in different number of transactions from 10k to 100k and the datasets are T50N100.....	43
Table 4.10 The execution time for transforming dataset into complement.....	46
Table 4.11 Execution time in second for different number of itmes from 10 to 40 (dataset=D10kT5, minsup=60%).....	46
Table 4.12 Execution times in second for different number of items from 100 to 200 (dataset=D10kT60, minsup=60%).....	47
Table 4.13 Execution time for different number of items from 100 to 200 (N- T =60, D =10k, minsup=60%).....	50
Table 4.14 Execution time for different number of items from 80 to 180 (N- T =40, D =10k, minsup=60%).....	50

Table 4.15 Execution time for generating complement dataset.	50
Table 4.16 Execution time in seconds for different average size of transactions from 10 to 30 (dataset=D10kN50, minsup=60%).....	53
Table 4.17 Execution time in seconds for different average size of transactions from 30 to 70 (dataset=D10kN100, minsup=60%).	53
Table 4.18 Execution time for generating complement datasets.....	54
Table 5.1 List of learning objects.	60
Table 5.2 Frequent supersets of the dataset in Figure 5.2.	61
