

## **Acknowledgements**

I would like to express my sincere gratitude and appreciation to my advisor, Dr. Tzu-Chieh Tsai, for providing me the chance to be in the research area of wireless communications. This work would not be completed without his expert guidance and mentorship. Also, I would like to thank my committees: Dr. Hsiao-Kuang Wu, Dr. Chen-Fu Chou, and Dr. Yea-Li Sun for offering their precious comments on this work.

During these two years, many people and friends have provided their help and support to me in every way. First, I would like to thank all my Lab-mates in MCLAB1: Robin Chen and Chien-Chi Lin, for those nights in the LAB producing experimental statistics together. Zheng-Lin Li, Sol-Han Chang, Li-Wei Hong and Tzu-Yin Liu, thank you for sharing the experience and thoughts in our research and studies. Also, I would like to thank Chi-Hung Chiang for his pioneering explorations in IEEE 802.16 networks. I would also like to thank my friends in MCLAB2, Larry Hsiao and Tsung-Ming Lin, for their generous help and time.

I would also like to thank all the friends in National Cheng-Chi University for their companionships: Amy Chia, Betty Liu, Shelly Jane, Chih-Hua Chang, Ming-Han Wu and I-Fan Yu.

Finally, I would like to thank my family for their constantly unconditional support and encouragement. And to Steffy Lin, Thank you for the staying and the forgiveness all these years.
