ACKNOWLEDGEMENT

I would like to express my most sincere gratitude to my advisor, Dr. Chieh- Yue Yeh, for her wonderful guidance. She always took the time and effort to read my paper, and gave plenty of valuable advices. Secondly, I want to thank Dr. Cynthia Wu, who initiated my interest in this area of research, and helped me to get my thesis started. Next, I owe many thanks to Dr. Sun-Fa Su who generously offered his time and valuable advices as well. I would also like to thank Dr. Lan Rae, who also helped me tremendously at the beginning of my research. In addition, I want to thank the two participants in the study. Without their willingness, generosity, and cooperation, I would not have been able to continue with my research. I also want to thank Pei Hsuan, a good friend who always lends her ears to my problems. Lastly, I want to thank my mother and brother for all their love and support; without them, I would not be able to complete my Master's degree.
