

摘要

由於蘇聯解體所導致的核擴散，這個世界比起過去更加危險。新的安全威脅源自於俄羅斯核物質、武器與科學家的擴散。另一方面，俄羅斯軍事力量的下降導致俄羅斯提高了核武器在未來戰爭中的作用。俄羅斯國家安全構想與軍事學說的轉變可能升高核戰爭的可能性。在本文中，筆者將探討由俄羅斯所引起的核擴散風險。

Abstract

Because of the nuclear proliferation caused by the collapse of USSR, the world is more insecurity than before. The new security threat comes from the spread of Russian nuclear materials, weapons and scientists. On the other hand, the decline of Russian military leads Russia to pay much attention on the use of nuclear weapon in the future warfare. The change of the Russian national security concept and military doctrine may raise the possibility of nuclear war. In the paper, author will study the risk of nuclear proliferation caused by Russia
