

## Appendix

### Appendix — A- Delphion Collection Coverage<sup>210</sup>

#### United States Patents and Applications

The US Patents and Applications collection includes full text and images of granted patents and patent applications published by the US Patent and Trademark Office (USPTO).

#### European Patents and Applications

This collection contains European granted patents and patent applications published by the European Patent Office. It provides full text and images.

#### German Patents and Applications

The German Applications collection contains German granted patents, utility models and patent applications published by the German Patent and Trademark Office combined with German data provided by INPADOC.

#### INPADOC

INPADOC is one of the most comprehensive patent collections in the world. It contains patent family documents from 71 world patent signatories and legal status information from 42 patent offices. Delphion brings together both of these pieces of information into a single searchable database and makes available 30 million patent family documents and 45 million legal status actions. Family and legal status data are displayed in a patent's Integrated View.

#### Patent Abstracts of Japan (PAJ)

Japanese unexamined patent applications in English for both Japanese and non-Japanese priorities. At present, representative first pages are available for viewing online.

#### WIPO PCT Publications (WO)

PCT stands for the "Patent Cooperation Treaty." PCT publications are abstracts, full document images, and full text from over a hundred member countries.

#### Derwent World Patents Index (DWPI)

---

<sup>210</sup> Delphion (2006). Retrieved June 14, 2006, from [www.delphion.com](http://www.delphion.com)

DWPI is the most comprehensive database of value-added patent information in the world. Covering over 11 million separate inventions from over 40 different international patent-issuing authorities, DWPI is ideal for prior art searching, monitoring competitors, and keeping your research knowledge up-to-date.

\*Occasionally, new data is available earlier than expected. When that happens, the Date Collection Last Updated will not match the Scheduled Update Day.

\*\*Representative first page only.

†Delphion backfile collections are being reclassified one authority at a time (US Apps, US Granted, WO, EP, JP, DE, INPADOC) to include IPC R codes for publications issued prior to January 1, 2006. Availability of individual collections will be indicated in this column, with an overall completion date in mid-June, 2006.

## Appendix — B- IPDL Data Collections<sup>212</sup>

### Patents (PCT):

This service provides access to over one million published PCT international applications and to the latest bibliographic data and documents contained in the files of PCT international applications. The service provides, in particular: advanced and rapid search facilities, including full-text search for applications published in latin languages since April 1998; the complete collection of published PCT international applications from the first publication in 1978 to the present day; access to published PCT international applications on the publication date every week; ability to print and/or download complete documents in a variety of formats; the latest bibliographic data available on record at the International Bureau, including changes since publication; access to status information, published documents and file contents through a single system.

### Trademarks (International Marks):

The Madrid Express database includes all international registrations that are currently in force or have expired within the past six months. It reflects the situation of the International Register of Marks as at 14/06/2006. It also includes data relating to international applications and subsequent designations that have been received by the International Bureau but have not yet been recorded in the international register of marks. With regard to these, users are warned that the International Bureau has not yet made a decision on the international applications or subsequent designations concerned. While every effort is made to ensure that this information accurately reflects the data recorded in the International Register, the only official publication remains the Gazette and the only official statements by the International Bureau regarding the contents of the International Register for a given international registration remain the certified extracts from the Register established on request by the International Bureau.

### Designs (International Registration of Industrial Designs):

The Hague Express Database includes bibliographical data and, as far as international registrations governed exclusively or partly by the 1999 and/or by the 1960 Act(s) of the Hague Agreement are concerned, reproductions of industrial designs relating to international registrations that have been recorded in the

---

<sup>212</sup> Intellectual Property Digital Library (IPDL) (2006), *IPDL data collections*, Retrieved June 14, 2006, from <http://www.wipo.int/ipdl/en/>

International Register and published in the International Designs Bulletin as of issue No. 1/1999. The data presented on Hague Express are in accordance with the situation of the International Register of Industrial Designs as at 28/04/2006. While every effort is made to ensure that this information accurately reflects the data recorded in the International Register, the only official publication remains the Bulletin and the only official statements by the International Bureau regarding the contents of the International Register for a given international registration remain the certified extracts from the Register established on request by the International Bureau.

### **Article 6ter (State Emblems, Official Hallmarks, and Emblems of Intergovernmental Organizations):**

The Article 6ter Express database includes all communications made so far under Article 6ter of the Paris Convention for the Protection of Industrial Property (Paris Convention) by States and international intergovernmental organizations. It is updated as soon as a new request for communication is sent to the States party to the Paris Convention and to the Members of the World Trade Organization (WTO). While every effort is made to ensure that this information accurately reflects the data sent to the parties mentioned above, the only official information for a given communication remains the circular by which the International Bureau has communicated the emblems and hallmarks of a State or the names, abbreviations and emblems of an international intergovernmental organization.

### **Lisbon (Appellations of Origin):**

This database contains information on all the appellations of origin entered, in accordance with the Lisbon Agreement for the Protection of Appellations of Origin and their International Registration, in the international register kept by the WIPO International Bureau and which are in force. For the convenience of users, the products covered by the appellations of origin registered under the Lisbon Agreement are classified in accordance with the International (Nice) Classification of Goods and Services for the Purposes of the Registration of Marks.

## **Other Collections**

### **Health Heritage (Traditional Knowledge Test Database):**

This compilation provides a test database of public domain traditional knowledge, which is made available on the WIPO website at the request of the Indian Government. The test database is based on the "Health Heritage CD-ROM", which

was compiled by the Council of Scientific and Industrial Research (CSIR) of India. It contains documentation data of codified traditional knowledge, all of which is already in the public domain. It may be used as a trial product to test the perceived potential of traditional knowledge databases for improving the availability of disclosed traditional knowledge as searchable prior art. All the documentation data in the database were collected and compiled by the Indian CSIR and were provided to WIPO with a request to make the data available online.

**JOPAL (Journal of Patent Associated Literature):**

This database contains bibliographic details of articles published in leading scientific and technical periodicals from 1981 to December 2005.

## Appendix — C- Search in Delphion: Google's Patents

### (Search Result: Patents)

Title	Derwent Title	Publication Date	Filed Date	IPC
US (Granted)	19 matches found of 3,994,897 patents searched			
<a href="#">US7031954</a> Document retrieval system with access control	Document retrieval method in network environment, involves restricting person from discovering non-compatible uniform resource locator with person's access level, by delivering and withholding compatible and non-compatible URL respectively	2006-04-18	1997-09-10	G06F17/30
<a href="#">US6678681</a> Information extraction from a database	Computer-based information extraction method in Internet-based services, involves analyzing occurrences of tuples of information in database to identify storage patterns, so as to extract additional tuples of information	2004-01-13	2000-03-09	G06F17/30
<a href="#">US6754873</a> Techniques for finding related hyperlinked documents using link-based analysis	Related web pages list generating method, involves generating score for each web page in different set based on values of forward links pointing to web page and generating list of related pages based on scores of web pages	2004-06-22	2000-04-06	G06F17/30
<a href="#">US6615209</a> Detecting query-specific duplicate documents	Result storage facility of documents, stores query relevant portions of documents and final query results set, such that final query results set does not include any duplicate query results	2003-09-02	2000-01-06	G06F17/30
<a href="#">US7031961</a> System and method for searching and recommending objects from a categorically organized information repository	Information repository searching method for software application, involves deriving at least one additional keyword from collection of content pointers, which is associated with query keyword	2006-04-18	2000-01-04	G06F17/30
<a href="#">US6839702</a> Systems and methods for highlighting search results	Search terms highlighting method for use in web document, involves highlighting occurrences of search term in intercepted web document, and automatically searching intercepted web document to locate each occurrence of search term	2005-01-04	2000-12-13	G06F17/30
<a href="#">US6529903</a> Methods and apparatus	Search result provision method for online services, involves generating secondary index	2003-03-04	2000-01-26	G06F17/30

for using a modified index to provide search results in response to an ambiguous search query	from secondary information and mapping information to compare with the search query			
<a href="#">US6658423</a> Detecting duplicate and near-duplicate files	Duplicate documents determining method for Internet, involves determining whether or not documents are near-duplicate documents based on fingerprints other than those identified as associated with only one document	2003-12-02	2001-01-24	G06F 17/30
<a href="#">US6982945</a> Baseband direct sequence spread spectrum transceiver	A baseband direct sequence spread spectrum transceiver for a code division multiple access communication system includes modulation with orthogonal and pseudo random number codes, and baseband transmission by a short antenna	2006-01-03	2001-01-26	H04J 11/00
<a href="#">US6526440</a> Ranking search results by reranking the results based on local inter-connectivity	Document identification method for web-based applications, involves refining relevance sources for documents in initial set based on local score value that quantifies amount of reference of at least two documents	2003-02-25	2001-01-30	G06F 17/30
<a href="#">US7027987</a> Voice interface for a search engine	Search result provision method in information retrieval system, involves providing search results by constructing weighted Boolean query using derived recognition hypotheses with weight and terms from voice search query	2006-04-11	2001-02-07	G10L 15/08
<a href="#">US6941293</a> Methods and apparatus for determining equivalent descriptions for an information need	Computer-implemented method for determining equivalent descriptions for information need, involves determining each half of candidate pair to be equivalent description for information need, if score exceeds defined threshold	2005-09-06	2002-02-01	G06F 7/00
<a href="#">US6725259</a> Ranking search results by reranking the results based on local inter-connectivity	Documents generating method, involves generating refined relevance scores for two documents based on local score value and initial relevance scores, and sorting documents based on assigned relevance scores	2004-04-20	2003-01-27	G06F 17/30
<a href="#">US6865575</a> Methods and apparatus for using a modified index to provide search results in response to an ambiguous search query	Numeric index generation method for search engine, involves translating alphanumeric information associated with alphanumeric index received from client device, to numeric information using mapping table, to define numeric index	2005-03-08	2003-01-27	G06F 17/30
<a href="#">US6934634</a> Address geocoding	Method for generating geographic coordinate data of network resources involves identifying	2005-08-23	2003-0	G06F

Planning Intellectual Property for Marketing Strategies
