

# Contents

|   |    |
|---|----|
| <b>Chapter 1 Introduction</b>                 | 1  |
| 1.1 Background                                | 1  |
| 1.2 Motivation and Objective                  | 2  |
| 1.3 Scope                                     | 4  |
| 1.4 Outline                                   | 4  |
| <br>  |    |
| <b>Chapter 2 Literature Review</b>            | 6  |
| 2.1 Dynamic Financial Analysis                | 6  |
| 2.2 Modeling Language                         | 10 |
| 2.3 Decision Support System                   | 14 |
| <br>  |    |
| <b>Chapter 3 System Analysis and Design</b>   | 19 |
| 3.1 System Analysis                           | 19 |
| 3.2 Design Philosophy for a New DFA System    | 24 |
| 3.3 System Architecture                       | 29 |
| 3.3.1 Model Transformation Subsystem          | 30 |
| 3.3.2 Processing Subsystem                    | 32 |
| <br>  |    |
| <b>Chapter 4 System Implementation</b>        | 34 |
| 4.1 DFA Object-Oriented Framework             | 35 |
| 4.2 Arrangement of Commonalities and Variants | 39 |
| 4.3 User Interface Design                     | 43 |
| <br>  |    |
| <b>Chapter 5 Summary and Future Work</b>      | 48 |
| 5.1 Conclusion                                | 48 |

|   |           |
|---|-----------|
| 5.2 Future Work                           | 49        |
| <b>Reference</b>                          | <b>50</b> |
| <b>Appendix A: AssetItem Hierarchy</b>    | <b>53</b> |
| <b>Appendix B: BusinessLine Hierarchy</b> | <b>54</b> |

## List of Figures

|   |    |
|---|----|
| Figure 2-1 American Re-Insurance Company's Risk Management System   | 8  |
| Figure 2-2 Main structure of a DFA model                            | 9  |
| Figure 2-3 Modeling language in LINGO                               | 14 |
| Figure 2-4 Typical architecture of DSS                              | 16 |
| Figure 2-5 Architecture of DSS for Credit Rating                    | 17 |
| Figure 3-1 DFA process  | 20 |
| Figure 3-2 Figure 3-2 Three Phases in DFA Processes                 | 23 |
| Figure 3-3 Conventional DFA computer system development process     | 25 |
| Figure 3-4 High level overview of MLDFA                             | 26 |
| Figure 3-5 Example: Object entity                                   | 27 |
| Figure 3-6 Example: Source codes                                    | 28 |
| Figure 3-7 System architecture of MLDFA                             | 30 |
| Figure 4-1 BalanceSheet hierarchy                                   | 36 |
| Figure 4-2 Commonalities and variants                               | 40 |
| Figure 4-3 Commonalities and variants in framework                  | 41 |
| Figure 4-4 Commonalities and variants in MLDFA                      | 42 |
| Figure 4-5 Screenshot of Model Transformation Subsystem             | 44 |
| Figure 4-6 Example: Partial content of XML                          | 46 |
| Figure 4-7 Example: Template for Interest Rate Object (Partial)     | 46 |
| Figure 4-8 Example: Output codes for Interest Rate Object (Partial) | 47 |
| Figure A-1 AssetItem hierarchy                                      | 53 |
| Figure B-1 BusinessLine hierarchy                                   | 54 |

## List of Tables

|   |    |
|---|----|
| Table 3-1 Overview of risk factors                      | 21 |
| Table 4-1 Processes of cash inflow                      | 38 |
| Table 4-2 Summary of transaction processes in framework | 38 |
