Contents

Chapter **Page**

1 Introduction ---------- 1

2 Literature Review ---------- 5

2.1 Business Information Systems ---------- 5
2.2 Legacy Business Information Systems ---------- 9
2.3 The Deployment Problem and Its Solutions ---------- 14
2.4 Visual Basic-Like Visual Programming ---------- 20
2.5 Summary of Literature Review ---------- 24

3 Research Design ---------- 26

4 How to Overcome the Shortcomings of ActiveX Component Technology ---------- 30

5 Assumptions of the Solution ---------- 34

6 Part 1 of the Solution: The Downloadable Architecture ---------- 35

6.1 Elements of the Downloadable Architecture ---------- 35
6.2 Interactions among Elements ---------- 39
6.3 Communications among Elements ---------- 40
6.4 Web Browser Security Settings ---------- 41

7 Part 2 of the Solution: The Architecture Transformation Process ---------- 44

7.1 The Client Program Architecture Transformation Process ---------- 44
7.2 Making the ActiveX Component ---------- 46
7.3 Making the Installation Instructions File (INF File) ---------- 48
7.4 Packing the ActiveX Component and Its Dependent DLLs ---------- 52
7.5 Making the Package Carrier ---------- 53

8 Case Study 1: A Book Management System ---------- 57

8.1 About the System ---------- 57
8.2 Improving the Deployability of the System ---------- 58
8.3 Testing the System ---------- 67

9 Case Study 2: A Salary Transfer Management System ---------- 69

9.1 About the System ---------- 69
9.2 Improving the Deployability of the System ---------- 70

10 Conclusion ---------- 78

References ---------- 80

Figures

Figure **Page**

1. Business Information System Principles ---------- 6
2. Research Process Model ---------- 27
3. Architectural Overview of Two-Tier Windows-Based C/S BISs ---------- 36
4. Architectural Overview of Two-Tier Downloadable BISs ---------- 37
5. Client Program Architecture Transformation Process Model ---------- 45
6. Example Installation Instructions File ---------- 50
7. Packing the ActiveX Component Using Cabarc.exe ---------- 53
8. Packing the Dependent DLL Using Cabarc.exe ---------- 53
9. Example of Creating an ActiveX Component Instance Using the OBJECT Tag ---------- 55
10. Example Package Carrier ---------- 56
11. The Log In/Out ActiveX Component of the Downloadable Book Management System ---------- 60
12. The Book Search ActiveX Component of the Downloadable Book Management System ---------- 62
13. The My Profile ActiveX Component of the Downloadable Book Management System ---------- 64

14. The Book Data Management ActiveX Component of
the Downloadable Book Management System ---------- 66

15. The Log In/Out ActiveX Component of
the Downloadable Salary Transfer Management System ---------- 72

16. The Payroll Making ActiveX Component of
the Downloadable Salary Transfer Management System ---------- 74

17. The Employee Data Management ActiveX Component of
the Downloadable Salary Transfer Management System ---------- 76
