Notes: Although there are more than 30 midstream petrochemical products, data on some of these products are unavailable and incomplete. Therefore, only 21 products are chosen and used in this paper. They are SM, VCM, ML, EG, VAM, PA, DOP, PTA, CPL, AN, ME, CB, PVC, LDPE, HDPE, PS, PP, PVA, ABS, SBR, BR. As to their full names, please refer to Appendix 2C. PCM^d stands for the weighted average of the domestic firms' $PCMs$ in two countries; H^d domestic concentration; MR import share; ER export share.
