

Figures

Figure 1 The phase diagram 11

Figure 2 Negative slope of $\dot{b} = 0$ locus and the saddle path ZZ 12

Figure 3 The effects of an anticipated permanent increase in π

and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0+} < 1)$ locus is on the right of
the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} = 0$ —
smaller T 21

Figure 4 The effects of an anticipated permanent increase in π

and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0+} < 1)$ locus is on the left of
the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} = 0$ —
smaller T 22

Figure 5 The effects of an anticipated permanent increase in π

and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0+} < 1)$ locus is on the right of
the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} = 0$ —
greater T 24

Figure 6 The effects of an anticipated permanent increase in π

and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0+} < 1)$ locus is on the left of
the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} = 0$ —

greater T 25

Figure 7 The effects of an unanticipated permanent increase in the inflation rate 27

Figure 8 The effects of an anticipated permanent increase in π and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0^+} < 1)$ locus is on the right of the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} < 0$ 32

Figure 9 The effects of an anticipated permanent increase in π and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0^+} < 1)$ locus is on the left of the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} < 0$ 33

Figure 10 The effects of an anticipated permanent increase in π and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0^+} < 1)$ locus is on the right of the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} > 0$ 38

Figure 11 The effects of an anticipated permanent increase in π and the $\dot{b} = 0(\pi_0, \tilde{\lambda}_1, q_{0^+} < 1)$ locus is on the left of the $\dot{b} = 0(\pi_0, \tilde{\lambda}_0, \tilde{q} = 1)$ locus when $U_{cl} > 0$ 39
