

TABLE OF CONTENT

CHAPTER 1	INTRODUCTION	1
CHAPTER 2	INTERVAL TIME SERIES ANALYSIS AND FORECASTING	4
2.1	INTRODUCTION.....	4
2.2	THE CHARACTERISTICS OF INTERVAL DATA	6
2.2.1	<i>Why Using Interval?</i>	6
2.2.2	<i>An Interval as a Fuzzy Number</i>	7
2.2.3	<i>The Forecasting Models of Interval Time Series</i>	10
2.3	THE EFFICIENCY ANALYSIS OF INTERVAL TIME SERIES FORECASTING	12
2.3.1	<i>The Mean Squared Error of Interval</i>	13
2.3.2	<i>The Mean Relative Interval Error</i>	14
2.4	SIMULATION ANALYSIS AND DISCUSSIONS	16
2.4.1	<i>Simulations of Interval Time Series</i>	16
2.4.2	<i>Model Construction of Interval Time Series</i>	18
2.4.3	<i>The Comparison and Analysis of the Forecast Results</i>	19
2.5	TWO CASE ANALYSES	24
2.5.1	<i>The Monthly Trading Value of the Stock</i>	24
2.5.2	<i>The Daily Temperatures in Taipei</i>	26
2.6	CONCLUSIONS	29
CHAPTER 3	PERFORMANCE ANALYSIS OF INTERVAL FORECASTING	31
3.1	INTRODUCTION.....	31
3.2	INTERVAL FORECASTING	32
3.2.1	<i>Time Series Forecasting with Interval Data</i>	32
3.2.2	<i>Some Operations of Interval Data</i>	34
3.2.3	<i>Properties of Interval Time Series</i>	35

3.3 EFFICIENCY EVALUATION FOR INTERVAL FORECASTING.....	37
3.3.1 <i>The Comparison of MESI and MRIE</i>	37
3.3.2 <i>The Feasibility Analysis of MSEI and MRIE</i>	38
3.4 THE MEAN RATIO OF EXCLUSIVE-OR.....	40
3.4.1 <i>The Mean Ratio of XOR</i>	40
3.4.2 <i>Discussion of MRXOR in Different Forecasting Situations</i>	41
3.5 EMPIRICAL STUDIES.....	43
3.5.1 <i>The Efficiency Analysis of Three Forecasting Situations</i>	44
3.5.2 <i>The Forecasting Performance of Temperature</i>	46
3.6 CONCLUSIONS.....	49
CHAPTER 4 AN INNOVATIVE APPROACH ON FUZZY CORRELATION COEFFICIENT WITH	
INTERVAL DATA.....	51
4.1 INTRODUCTION.....	51
4.2 CORRELATION COEFFICIENT.....	52
4.2.1 <i>Traditional Correlation Coefficient</i>	52
4.2.2 <i>Correlation Coefficient Interval</i>	53
4.3 FUZZY CORRELATION COEFFICIENT.....	56
4.3.1 <i>An approximation approach for a correlation coefficient interval</i>	56
4.3.2 <i>Comparison with the Traditional Correlation Coefficient</i>	58
4.4 EMPIRICAL STUDIES.....	59
4.4.1 <i>Calculus Score and Online Hour</i>	60
4.4.2 <i>Temperature and Relative Humidity</i>	62
4.5 CONCLUSIONS.....	65
REFERENCES.....	67

LIST OF TABLES

<i>Table 2.1</i> <i>The comparison of the forecast and simulated values for the last 6 intervals in Model (2.1).</i>	20
<i>Table 2.2</i> <i>The comparison of the forecast and simulated values for the last 6 intervals in Model (2.2).</i>	20
<i>Table 2.3</i> <i>The comparison of the forecast and simulated values for the last 6 intervals in Model (2.3).</i>	20
<i>Table 2.4</i> <i>The comparison of the forecast and simulated values for the last 6 intervals in Model (2.4).</i>	21
<i>Table 2.5</i> <i>The comparison of the efficiency of the forecasting methods for Model (2.1).</i>	21
<i>Table 2.6</i> <i>The comparison of the efficiency of the forecasting methods for Model (2.2).</i>	21
<i>Table 2.7</i> <i>The comparison of the efficiency of the forecasting methods for Model (2.3).</i>	22
<i>Table 2.8</i> <i>The comparison of the efficiency of the forecasting methods for Model (2.4).</i>	22
<i>Table 2.9</i> <i>The monthly trading values of China Steel stock and their forecasts by the proposed interval forecasting methods for the latter 6 periods from 4/2006 to 9/2006.</i>	25
<i>Table 2.10</i> <i>The comparison of efficiency of the proposed interval forecasting methods for the interval time series of monthly trading values of China Steel stock.</i>	25
<i>Table 2.11</i> <i>The daily temperature in Taipei and their forecasts by the proposed interval forecasting methods for the latter 6 periods from 4/25/2008 to 4/30/2008. ($X = (m, l, u)_{LR}$).</i>	27
<i>Table 2.12</i> <i>The daily temperature in Taipei and their forecasts by the proposed interval forecasting methods for the latter 6 periods from 4/25/2008 to 4/30/2008. ($X = (c, r, r)_{LR}$).</i>	27
<i>Table 2.13</i> <i>The comparison of efficiency of the proposed interval forecasting methods for the interval time series of daily temperature in Taipei. ($X = (m, l, u)_{LR}$).</i>	28
<i>Table 2.14</i> <i>The comparison of efficiency of the proposed interval forecasting methods for the interval time series of daily temperature in Taipei. ($X = (c, r, r)_{LR}$).</i>	28

<i>Table 3.1</i>	<i>The actual intervals and the three sets of forecasting intervals.</i>	<i>43</i>
<i>Table 3.2</i>	<i>The comparison of evaluating forecasting performance for simulated interval data.</i>	<i>44</i>
<i>Table 3.3</i>	<i>The comparison of evaluating forecasting performance for temperature interval data.</i>	<i>47</i>
<i>Table 4.1</i>	<i>The ages and the blood pressure data of 10 patients</i>	<i>55</i>
<i>Table 4.2</i>	<i>Fuzzy correlation coefficient of score and online hour for Λ-type</i>	<i>61</i>
<i>Table 4.3</i>	<i>Fuzzy correlation coefficient of score and online hour for S-type</i>	<i>61</i>
<i>Table 4.4</i>	<i>Fuzzy correlation coefficient of temperature and relative humidity for S-type</i>	<i>64</i>

LIST OF FIGURES

<i>Figure 2.1</i> LR-type interval X	8
<i>Figure 2.2</i> The interval time series generated by the models.	18
<i>Figure 2.3</i> The chart of the monthly trading values of China Steel stock from 4/1999 to 9/2006. ...	25
<i>Figure 2.4</i> The chart of the daily temperatures in Taipei from 4/1/2008 to 4/30/2008.	27
<i>Figure 3.1</i> One encoding lists the relations of the four pairs of end points in a fixed sequence.	33
<i>Figure 3.2</i> The forecast intervals are too wide.	44
<i>Figure 3.3</i> The forecast intervals incline to right.	45
<i>Figure 3.4</i> The forecast intervals are too narrow.	45
<i>Figure 3.5</i> The forecast intervals of IMA.	47
<i>Figure 3.6</i> The forecast intervals of WIMA.	47
<i>Figure 3.7</i> The forecast intervals of ARIMA of $(C, R)_{LR}$	48
<i>Figure 3.8</i> The forecast intervals of ARIMA of (m, l, u)	48
<i>Figure 4.1</i> Two kinds of data for score and online hour.	59
<i>Figure 4.2</i> Temperature and relative humidity in April 2008.	63
